

JOB OFFER: PROJECT ENGINEER SPACE & DEFENCE

STAM is currently recruiting for a Project Engineer to join its office in Genoa or Rome, within the Space & Defence team.

ACTIVITIES:

As a Project Engineer you will be involved in key Projects in the sector of Space & Defence and, according to your skills and suitability, you will contribute to projects tasks such as:

- Requirements analysis and specification definition for Command-and-Control systems, supporting the whole system engineering process.
- Support to Program and Project management activities for the main Industries of the sector.
- Development of simulation models, simulators and digital twins, mainly for Space & Defence applications, such as anti-drone systems, maritime security etc.
- Risk assessment for managing information security aspects of Space and Defence Systems, support to certification phase and evaluation of compliance with reference standards and regulations.
- Preparation of all relevant technical documentation and support to the preparation of technical proposals for public bodies and private customers, according to your level of experience and skills.

REQUIREMENTS:

- MSc System Engineering, Electronic Engineering, Telecommunication Engineering, Computer Science, or equivalent STEM degree.
- No previous working experience is required but a genuine interest in increasing knowledge of Space and Defence systems and applications.
- Good teamworking and communication skills
- Knowledge of system engineering principles and tools for software architecture modelling and requirements management is a plus.
- Experience with simulations tools and agent-based modelling is a plus.
- Knowledge of IT and cybersecurity principles is a plus.
- Critical thinking, problem-solving and attention to the detail.
- Planning skills and abilities in respect of deliveries and in the management of one's own time.
- Good level of English (both spoken and written).
- Willingness to travel in Italy and abroad.

WHAT YOU GET:

- Opportunity to work on innovation projects, being engaged on different activities and increasing skills on cutting-edge technological solutions and applications.
- Possibility to influence from the beginning by working in AGILE and multidisciplinary teams.
- Constantly engage with the challenges of state-of-the-art and future technologies.
- Enhance your skills and build a career path of excellence.

WORKING LANGUAGES: Italian and English.

WORKING LOCATION: Genoa, Rome.

TYPE OF CONTRACT: Full time

WHY WORKING IN STAM:

STAM is a fast-growing multidisciplinary engineering company, with a team of young talents involved in international projects alongside corporates, SMEs and start-ups in various fields and industrial sectors. The company has been involved in over 600 projects to date and has an ambitious development plan that requires the constant inclusion of brilliant and eager candidates / and to grow professionally within a dynamic and excellent company.

STAM is a reality that puts its talents at the centre and enhances their skills and ability to shape the growth of the company, promoting the contamination of disciplines, intrapreneurship, and meritocracy.

This is a very good opportunity to join STAM'S team and to actively contribute to the development of the Space & Defence Area, becoming part of a company that offers great possibilities to learn and grow.

Talent development is a managerial principle at STAM, and we are committed to fostering the growth of our employees with full respect of gender balance.

THE SELECTION PROCESS:

Please send your CV in English to e.maggiani@stamtech.com ref. "Project Engineer", including a convincing cover letter, summing up your strengths and relevance to the job position at stake.

The received CVs will be evaluated and only the selected candidates will be contacted and invited to a job interview.
